

EMILIANO DONGOCHÉ

COMPUTER ENGINEER / SYSTEMS DEVELOPER

Camama, Luanda, Angola | (+244) 929 869 166 | emilianodongoche@gmail.com

PROFESSIONAL PROFILE

Computer Engineer with hands-on experience designing and developing full-stack web systems, including building from the ground up an Integrated Web Management System currently in production at the Museum of Communications. I turned institutional processes previously handled on paper into a centralized digital workflow, using React, Python/FastAPI, SQLAlchemy and PostgreSQL, with JWT authentication, role-based access control (RBAC) and business rules.

My experience combines software development, systems modeling and an understanding of IT infrastructure, allowing me to work not only on implementing features but also on identifying the problem, structuring the solution and integrating it with the technological environment.

What sets me apart for a development team is hands-on experience turning an institutional need into a functional system — not just knowledge gained in an academic setting.

EDUCATION

Bachelor's Degree in Computer Engineering <i>Katangoji Polytechnic Institute, Luanda</i>	2021 – 2026
Technical Secondary Education in Informatics <i>Mundo Novo School, Luanda</i>	2016 – 2019

PROFESSIONAL EXPERIENCE

IT Technician <i>Museum of Communications, Luanda</i>	2025 – 2026
- Digitized institutional processes previously handled on paper, designing and building from the ground up an Integrated Web Management System to centralize collection and institutional information management. - Deployed a complete web solution to production, implementing React, Python/FastAPI, SQLAlchemy and PostgreSQL, from data structuring through to the application interface. - Implemented access control and application security using JWT authentication and RBAC, enabling different access levels according to user roles. - Translated museum-domain rules and requirements into software features, structuring business rules and digital workflows to replace procedures previously dependent on manual processes. - Centralized and structured institutional information, creating a technology foundation that facilitates data access, management and organization. - Maintained the institution's technology operations, providing technical support to users and ensuring the functioning of IT equipment and resources.	
Infrastructure and Networking Intern <i>Kilamba Private Polytechnic Institute, Luanda</i>	Mar 2019 – Aug 2019
- Contributed to the implementation and maintenance of the institution's LAN infrastructure, working on tasks related to equipment and network connectivity. - Configured routers and switches and validated network topologies, using Cisco Packet Tracer to simulate different architectures and infrastructure scenarios. - Contributed to resolving technical issues for internal users, gaining hands-on experience in IT support and troubleshooting.	

PROJECTS & ACHIEVEMENTS

- Three-Time Champion, Student Science Fair:** 3× winner of the Student Science Fair ("Jornada Científica Estudantil") with technology projects in: IoT Smart Home; Academic Social Networking Platform; Automated University Access Control System.
- President, Katangoji Polytechnic Institute Students' Association (AEK), 2023–2026** — Led a multidisciplinary team of 25 members, institutionally representing students to the institute's leadership and external entities, and coordinating institutional projects.

TECHNICAL SKILLS

- Software Engineering:** Systems Modeling, Business Rules, Full-Stack Architecture, FastAPI, SQLAlchemy, React, Vite, Tailwind CSS, PostgreSQL, JWT Authentication and RBAC, Python, TypeScript, JavaScript, HTML.
- Applied AI:** Task and workflow automation.
- Networking:** LAN Network Administration, VLANs, TCP/IP, DHCP, DNS, OSI Model, Cisco Packet Tracer, Troubleshooting
- Systems:** Windows Server, Windows and Linux, Basic Cybersecurity

- **Tools:** Microsoft 365, Trello, Zoom

LANGUAGES

Portuguese — Fluent | English — C1 (Advanced)
